Techniques we use

Handmade

Our artisans hand-weave our fabulous doormats & rugs by intertwining vertical and horizontal yarn as well as skillfully handtufted designs.

Machine Made

Using modern technology, we can instruct a machine to create our doormats & rugs varying from simple to complex designs. Perfect for ensuring our pieces are consistent in colour, size, and texture throughout.

Machine Tufted

Machine tufted is when clusters of fibre are pierced through a material using a machine. Perfect for ensuring our pieces are consistent in colour, size, and texture throughout.

Machine Pressed

For our rubber doormats our artisans fill moulds with melted rubber, then apply pressure using a machine press to compress the material together.
